

Policy: 01-39-00

Key Security

OFFICE OF RECORD: Business Office
ISSUED BY: Director of Physical Plant
APPROVED BY: Doug Knowlton, 01-39-00
EFFECTIVE DATE: 11/15/90

REVISED: 7/27/05

Policy

To achieve effective campus security, DSU has replaced old locks and has implementing key control procedures. This policy does not apply to the residence halls or off-campus premises. All matters relating to keys should be directed to the Physical Plant. Responsibility for this program will reside with the Director of the Physical Plant.

The system allows the following levels of security:

1. Grandmaster Key- operates all locks in the system with some exceptions.
2. Master Key- operates all locks in the system assigned to it, most generally a building.
3. Sub-master Key - operates a section of the system under its parent master, most generally a floor in a building.
4. Individual Key - operates a lock or any lock having the exact same combination.

Procedures

Employees requiring security levels 3 or 4 keys must receive an authorization in writing from the attached list of building supervisors authorized to issue building keys. The employee must also sign a key agreement form before a key will be issued. At the time the employee leaves the institution, the employee's department must notify the Physical Plant in writing (email) verifying that all keys issued to said employee have been returned.

Employees requiring level 2 keys must receive an authorization in writing from their respective Vice Presidents' Council supervisor. Level 1 keys are authorized by the President only.

Keys may be checked out for weekend or any other short-term use period with the authorization of an employee's Vice Presidents' Council supervisor or building supervisor. Students requiring key access will need the authorization of a Vice Presidents' Council supervisor or building supervisor. Students will only be issued security levels 3 or 4.

Building supervisors may be issued a limited supply of level 3 or 4 keys to be issued by them for short-term use. Those building supervisors who are issued these keys will be required to keep accurate records on the location of such keys and will be periodically required to verify the inventory of keys issued under their name.

Lost or unreturned keys may require locks to be changed, which will result in a charge assessed to the office losing the key(s). Lost keys should be reported immediately to the Physical Plant using the attached forms available in the Physical Plant. Under no circumstances may an employee or student loan their key to another person, nor may any key be duplicated or replaced other than through the DSU Physical Plant.

Buildings Supervisors

Building	Title
Beadle Hall	Dean, College of Arts and Sciences
Dakota Prairie Playhouse	Events Coordinator, Director of Physical Plant
East Hall	Dean, College of Business & Information Systems
Heston Hall	President, Vice President for Academic Affairs, Vice President, Business & Administrative Services

KEY AGREEMENT

(to be signed by individual responsible for keys)

I, the undersigned, hereby acknowledge receipt of the key(s) described below, with the understanding that I shall be held solely responsible for its (their) safe-keeping for the full period during which it (they) is (are) in my custody and until it (they) has (have) been returned or properly transferred. I agree that should said key(s) be lost or otherwise not available, I will notify the Physical Plant and my supervisor immediately so that the lock(s) may be changed if necessary. I further agree that I will neither make, cause or knowingly permit to be made, or otherwise obtain, procure or provide, any duplicate, copy or facsimile of said key(s). It is understood that any willful violation of this agreement shall be considered full and sufficient cause for disciplinary action.
