STUDENT LEARNING OUTCOMES
B.S. in Computer Information Systems

Upon completion of the B.S. degree in Computer Information Systems, students will:

- be able to demonstrate the ability to analyze, identify, and define the requirements needed to address business problems and opportunities with technical solutions.
- be able to design applications for business using programming tools, techniques, and frameworks.
- be able to demonstrate proficiency in structuring, collecting and analyzing data to support business operations and strategic decision-making.
- be able to demonstrate a working knowledge of computer hardware, programming, and database management systems.
- be able to demonstrate knowledge of business disciplines, especially areas that can be optimized through the use of technology.
