STUDENT LEARNING OUTCOMES
D.Sc. in Information Systems

Upon completion of the D.Sc. degree in Information Systems, students will:

- be able to demonstrate a broad and comprehensive understanding of core knowledge and fundamental practices in information systems.

- be able to demonstrate conceptual knowledge and ability to utilize prevalent technologies of information systems.

- be able to demonstrate a highly developed knowledge of information systems literature, particularly in their area of specialization.

- be able to demonstrate a scholarly understanding of milestones and seminal works of leading researchers in their area of specialization.

- be able to demonstrate an understanding of information systems research methods and an ability to conduct research and evaluate research results.

- be able to effectively formulate, communicate, present and defend the results of their research and any conclusions drawn from it.
