

What should I do if I've been in close contact with someone ...

Close Contact:

- Spend prolonged period in same room
- Direct physical contact, kissing, hugging
- Shared eating or drinking utensils
- Contact with respiratory secretions (cough, sneeze on you)

What should I do if I am fully vaccinated and been in close contact with someone...

Get tested if experiencing symptoms. You must isolate if you test positive.

You should get tested 3-5 days after exposure to someone with suspected or confirmed positive and wear a mask in public indoor settings for 14 days after exposure or until you receive a negative test.
