What should I do if I’ve been in close contact with someone...

- **...who has tested positive for COVID-19**
  - You must quarantine. Take a COVID-19 Test during days 5-7. If negative, you can come out of quarantine earlier.
  - **Self-quarantine AND self-monitor**

- **...who is being tested?**
  - **Self-monitor AND practice social distancing**

- **...who might have been exposed...**
  - **...and IS experiencing symptoms?**
  - **Get tested if experiencing symptoms. You must isolate if you test positive.**
  - **You should get tested 3-5 days after exposure to someone with suspected or confirmed positive and wear a mask in public indoor settings for 14 days after exposure or until you receive a negative test.**
  - **Practice social distancing**

- **...who has been in close contact with someone ELSE who might have been exposed?**
  - **...but is NOT experiencing any symptoms (yet)?**
    - **Self-monitor AND practice social distancing**

**What should I do if I am fully vaccinated and been in close contact with someone...**
