What should I do if I’ve been in close contact with someone . . .

... who has tested positive for COVID-19

IF YOU ARE UP TO DATE ON COVID-19 VACCINATIONS: No quarantine. You do not need to say home unless you develop symptoms.

Get tested. Even if you don’t develop symptoms, get tested at least 5 days after you last had close contact with someone with COVID-19.

IF YOU HAD CONFIRMED COVID-19 WITHIN THE PAST 90 DAYS: No quarantine. You do not need to stay home unless you develop symptoms.

... who is being tested?

Close Contact:
- Was the person less than 6 feet away from someone with confirmed or suspected COVID-19?
- Has the person been in the presence of someone with confirmed or suspected COVID-19 for a cumulative of 15 minutes or more over a 24-hour period?

If the answers to the questions above are both YES, the person is a close contact, regardless of whether the person was wearing a mask properly.

If the answer to either of the questions above is NO, the person is not a close contact.

... who might have been exposed . . .

... and IS experiencing symptoms?

Self-monitor AND practice social distancing

... but is NOT experiencing any symptoms (yet)?

Practice social distancing

... who has been in close contact with someone ELSE who might have been exposed?
